- GitHub – Open Source Contributor
- Postman
- Figma
- Agile / Scrum, DSA, OOP

EDUCATION

BSc(Hons) Computer Science

2024 - Present

Informatics Institute of Technology ,LK Affiliated with
University of Westminster, UK

- Year 1 Modules:
 - Computer Systems Fundamentals
 - Mathematics for Computing
 - Software Development I (Python)
 - Software Development II (Java)
 - Trends in Computer Science
 - Web Design and Development
- Year 2 Modules:
 - Object Oriented Programming (Java)
 - Database Systems
 - Software Development Group Project
 - Client-Server Architectures
 - Algorithms: Theory, Design & Implementation
 - Machine Learning & Data Mining

Edexcel Advanced Level

2022-2024

Lyceum International School, Nugegoda

- Mathematics - A*
- Chemistry - A*
- Physics - B

Cambridge Ordinary Level

2020-2022

Lyceum International School, Nugegoda

- 3A*s, 4As, 1B

INTERESTS

- Web Development, Machine Learning, AI, Data Visualization, Competitive programming, Reading, Volunteering, Data Analysis, Travel, Problem-Solving challenges, UI-UX Design

PROJECTS

SetWemu – Event/Experience Marketplace (Group Project)

2025 – Present

- Developing a full-stack mobile application with authentication, event management, bookings, and social interactions
- Focused on frontend development, implementing responsive UI components, and integrating RESTful APIs to ensure smooth user interactions
- Collaborating in an Agile team using sprint planning, stand-ups, and backlog refinement
- Followed secure coding practices and maintained code quality on GitHub

Technologies Used : React Native, Node.js, Supabase

GitHub Link : <https://github.com/SetWemu/setwemu-mobile>

AI Study Planner – Full Stack Project

2026

- Built a Full-Stack AI web application that generates personalized day-by-day study schedules based on subjects, exam dates and study hours
- Implemented Google OAuth authentication using NextAuth.js
- Integrated Groq AI to generate intelligent study plans
- Built REST API routes for subject management and AI plan generation
- Used MongoDB for per-user data storage and deployed on Vercel via GitHub.

Technologies Used : Next.js, React.js, MongoDB, NextAuth.js, Tailwind CSS

GitHub Link : <https://github.com/diara12/AI-Study-Planner>

CBC E-Commerce Website – Full Stack Project

2025

- Built a Full-Stack web application for product browsing and order management
- Implemented backend services and integrated MongoDB for efficient data storage
- Improved user experience through intuitive UI design and optimized performance

Technologies Used : React, Node.js, MongoDB, Git

GitHub Link : <https://github.com/diara12/cbc-frontend>
